

Cary Super Vac Demonstration

This six minute demonstration was recorded at Cary Manufacturing Corporation to show the capability of the 10 HP. Cary Super Vac. The elements of the video are:

1. A side view of the Super Vac.
2. The three rubber clamps are undone.
3. The lid is removed.
4. A disposable, reusable cerex bag (\$3 each) is put in the 55 gallon receiver
5. The lid is replaced - this lid has a swivel elbow.
6. A different lid that is attached to a header system is put on the receiver.
7. 15 feet of 3" vinyl vacuum hose to a PVC elbow to 25 feet of PVC pipe (supported by pipe hangars) to 3" x 2" PVC wyes to two 12 foot 2" wire supported hoses to PVC nozzles.
8. A different view of the same header system.
9. A table of foam rubber, felt, and plastic film waste.
10. The waste being vacuumed with two nozzles.
11. One hose being capped and the other hose vacuuming the same type of waste.
12. One hose capped and the other vacuuming typical cotton textile waste.
13. With the lid removed, the cerex bag is removed for emptying.
