CARY Saw Vac

SAWVAC SYSTEM WITH CYCLONE LID

The **CARY** Saw Vac is designed to provide years of trouble-free service and continuous duty in industrial applications. It is a stationary unit for medium to heavy density waste associated with saws, routers and other cutting and trimming machines.

The **CARY** Saw Vac is designed with a Cyclonic Lid that strips away the waste using an internal baffle that allows it to drop into a 30-gallon collection drum. The Cyclonic Lid also employs a pleated filter to prevent lighter, floating materials from re-entering the regenerative blower creating the vacuum pull. The system can be used to pick-up sawdust & wood chips, metal chips, plastic chips, and dense powders & dirt, including slightly oily materials.

The **CARY** Saw Vac comes in three versions, 5 HP, 10.7 HP and 14.7 HP. Each version is mounted on a heavy-duty, welded steel frame with easily removed 30-gallon collection drum for dumping & disposal of waste. The 30-gallon collection drum comes with reinforced lifting handles on the sides to ensure secure grip by operator when removing from stand. Standard unit can be wired directly to power source, or an optional magnetic motor starter can be added and mounted to frame. Each version is custom-made with a choice of several inlet sizes available depending on customer application.

CARY Saw Vac System features include:

- **Capacity, 4.3 Cubic Feet**
- **No Maintenance Required**
- **Highly Reliable Fuji Regenerative Blower**
- **Heavy-Duty Welded Construction**
- **Low Noise**
- **High Air Flow & Suction**
- **Simple Operation & Waste Disposal**
- **Optional Magnetic Motor Starter available**

CARY SAW VAC SPECIFICATIONS

Model Number	SAWVAC-901	SAWVAC-801	SAW VAC-601
Motor Horsepower	14.7 HP	10.7 HP	5.0 HP
Sealed Water Lift	110 inch H2O	112 inch H2O	95 inch H2O
Waste Capacity, Cu.Ft.	4.3	4.3	4.3
Magnetic Motor Starter	Optional Add-on	Optional Add-on	Optional Add-on
Voltage	230/460/575	230/460/575	230/460/575
Phase	3	3	3
Frequency	60	60	60
Weight (lbs.)	450	350	250
